Tokelau locals get all essential supplies brought from Samoa by boat. (file photo). (file photo: AFP) In today's edition of Reel Talk, Stephanie Bandi reviewed Tokelau: The Solar Powered Island of the Future a documentary that showcases how the island nation harnesses the energy of the sun to power its three atolls.

How does Tokelau get its electricity?

It gets nearly all of its electricity from the sun. Tokelau is made up of three atolls. An atoll is a ring of small islands with seawater in the middle. The photo on page 10 shows one of the small islands. Each atoll has a power station. This square shows where the power station is on each atoll.

Why is Tokelau a renewable fuel?

Tokelau has a lot of coconut trees. The coconuts from the trees produce coconut oil, which can be burnt to produce electricity. Coconut oil is a renewable fuel because the people of Tokelau can grow more coconut trees. Oil, coal, and natural gas are fossil fuels. Scientists believe these fuels have been made underground over millions of years.

Is Tokelau a good place to live?

Tokelau is the first in the world to use renewable energy to make electricity. Everyone in Tokelau is very proud a small country has done such a big thing." Hilivelio's mother is very pleased, too. "Now, everyone is very happy because we have power twenty-four hours a day," she says, "and we have done something good for the environment too."

Specialties: Solar Contractor, Solar Installation Established in 2013. Golden Sun Electric was founded in 2013, to pursue our vision: high quality, low overhead solar installations.
