

Is Spain a leader in concentrated solar power?

As a legacy from Spain's earlier development of solar power, the country remains a world leader in concentrated solar power, accounting for almost a third of solar power installed capacity in the country, a much higher ratio than that for other countries as of 2017.

Does Spain have a solar resurgence?

“Self-generated energy soars in Spain as solar panels plunge in price”<sup>1</sup>. El País. ISSN 1134-6582. Retrieved 5 July 2019. “Economics not tenders driving Spain's solar resurgence”<sup>2</sup>. PV Tech. 23 April 2018. Retrieved 11 July 2019. “Spain's bulging solar pipeline heaps pressure on permitting”<sup>3</sup>. Reuters. 8 December 2022.

When will solar power be available in Spain?

In May 2017, Spain held an auction for new renewable capacity to be online by 2020. Solar projects won only 1 MW of the 3000 MW awarded. After complaints by the solar industry which felt the auction terms favoured wind power, another auction occurred in July.
