Avoid processed foods and sugary snacks, which can lead to energy crashes. A handful of nuts, Greek yogurt with berries, or a slice of whole-grain toast with almond butter are great options to rev up your energy. 3. Limit Caffeine. While coffee can provide a temporary energy boost, too much can lead to dependency and energy crashes.

Why the Spark Spread Is Critical for Your Profit Margins. The spark spread is not just a number--it's a tool that tells you if generating electricity is worth the cost of fuel. For energy producers, a positive spark spread means ...

The energy transition in Greece is progressing rapidly, with ambitious targets set for 2030 in the National Energy and Climate Plan (NECP), which is currently under public consultation. The country aims to increase the share of renewable energy sources (RES) in its final energy consumption to 45% and achieve an 80% share of RES in electricity ...

Greece is revving up its engine to become a regional energy hub and clean energy exporter for Europe. This ambitious vision took centre stage at the Davos Forum, where Deputy Environment and Energy Minister ...

More than three decades later, it operates only 3 percent of Greece's total capacity from renewables, equating to 150 megawatts, as government policies have forced it focus on coal. However, a commitment to shut down coal-fired plants generating nearly 2 gigawatts of power in the coming years under a European policy to fight climate change ...
