

Green cell fresh energy Bulgaria

What is Bulgaria's first hybrid energy project?

On September 19, the construction of Bulgaria's first hybrid project for renewable energy began, which includes capacities of 238 MW of solar power, 250 MW of wind turbines and batteries that store up to 500 MWh of energy.

What is green cell?

The Green Cell brand was born out of a passion for mobility. Our aim is to popularize electromobility solutions, improve energy efficiency and enable the use of consumer electronics without interference.

What is Bulgaria's energy policy?

In the early 2000s, Bulgaria's energy policy was characterized by a delicate balancing act between European aspirations and deep-rooted ties to Russia. Due to its strategic location in Southeast Europe (SEE), Bulgaria played a crucial role in various energy transit projects, particularly pipelines aimed at transporting natural gas.

Why did Bulgaria start exploring alternative energy options?

As a result, Bulgaria started to explore alternative energy options and sought to diversify its energy supply. This included increased interest in renewable energy sources, as well as efforts to strengthen its energy ties with the EU.

What role does Bulgaria play in energy transit projects?

Due to its strategic location in Southeast Europe (SEE), Bulgaria played a crucial role in various energy transit projects, particularly pipelines aimed at transporting natural gas. The country's participation in both the Russian-backed South Stream pipeline and the EU-endorsed Nabucco project demonstrated this dual allegiance.

In a matter of months, Bulgaria's total solar power capacity is set to exceed 3 GW, compared to just 1.3 GW at the end of 2021. The lineup in the list of the largest photovoltaic plants is changing almost every week as ...
