

Green Enesys Namibia

Who is green Enesys group?

Green Enesys Group is an international developer of cutting-edge renewable energy projects. With over a decade of experience, we have successfully delivered more than 70 utility-scale green energy initiatives, while simultaneously driving entrepreneurial efforts to pioneer next-generation green technologies.

Will Namibia become a supplier of energy?

Once Namibia has successfully incubated the green hydrogen economy, it will enable the country to become a supplier of energy, rather than an importer.

How will solar power benefit Namibia?

The generation of solar power will complement Namibia's available green energy portfolio, such as hydro-electricity, which already constitutes more than two-thirds of our installed power capacity. Electrifying key parts of our economy and of our neighbours will spur unprecedented economic activity and growth for Namibia and Southern Africa.

Does Namibia need a power trading system?

The required infrastructure for power trading already exists. About 40% of Namibia's power currently comes from South Africa and is primarily driven by coal-fired power plants. We imagine a reality where Namibia exports clean energy to South Africa thereby assisting the Southern African region to decarbonize.

Does Namibia have a vision of shared prosperity?

As Namibia embarks on this new frontier, it is imperative that its vision of shared prosperity on the national, regional and global levels is realized. Meaning that we do not neglect those without access to political and economic power today nor exclude those who currently rely on carbon fuels.

Aquila Capital Holdings GmbH agreed to acquire a 500-MW solar photovoltaic portfolio from Viridi RE GmbH and Green Enesys Deutschland GmbH subsidiary Solar Ambition. Financial terms of the deal were not disclosed. Under the deal, Viridi RE and Solar Ambition will continue developing the portfolio in Spain until it reaches ready-to-build status ...

green enesys. Opportunities. Solutions. Projects. About. Blog. Thermal Storage. We decarbonize heat with proven Thermal Energy Storage, advancing sustainable energy and cutting carbon emissions. Solution. Industry. We provide a cost-effective solution for industries such as Chemical & Petrochemical, Food & Beverage, Paper & Printing, and Mining.

The first Integrated Environmental Authorisation for an off-grid Green Hydrogen and E-methanol plant in Spain has been obtained by our long-standing partner, Viridi RE Group. Our SolWinHy Cádiz project, located in Arcos de la Frontera, is a groundbreaking development, operating entirely off the grid and powered
