

Greenland 5kw power station

What is the largest hydroelectric power plant in Greenland?

The Buksefjord hydroelectric power plant is the first and largest hydroelectric power plant in Greenland. It was built by Nuuk-Kraft and it is operated by Nukissiorfiit, Greenland's national energy company. [1] In 1984-85, Greenland's energy authority prepared a Greenland's hydroelectricity development program.

Where is Greenland power plant planned?

It is planned in Sermersooq, Greenland. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently at the permitting stage. It will be developed in a single phase. The project construction is likely to commence in 2025 and is expected to enter into commercial operation in 2029.

Where will a new hydropower plant be built in Greenland?

In addition, a new 21 MW hydropower plant will be built at the fjord Kangarsuneq to supply the towns of Qasigiannuit and Aasiaat in the Qeqertalik municipality on the southern shore of Disko Bay in western Greenland. The project is designed to be equipped with three 7 MW turbines to generate up to 100 GW/year.

Why is Greenland developing new hydropower capacity?

Greenland has approved the development of new hydropower capacity to reduce the country's use of fossil fuels for the production of electricity.

When did Greenland start producing electricity?

In 1984-85, Greenland's energy authority prepared a Greenland's hydroelectricity development program. At that time all electricity in Greenland was produced by oil based fuels, but there had been a sharp rise in oil prices in the preceding years. Construction of a plant in Buksefjord was proposed by a private consortium in 1988.

How much is Greenland's largest hydropower plant worth?

Expansion of Greenland's largest hydropower plant is to be tendered in one turnkey contract, with an estimated total value of DKK 1.8 billion (US\$266.7 million) excluding VAT, according to an indicative notice published on the EU's procurement website on 26 April. The contractor will be responsible for both civil and electrical works.

Greenland's NunaGreen in partnership with national energy utility Nukissiorfiit is set to launch a market dialogue with interested general contractors for the expansion of the 45 MW Buksefjord ...

Buksefjorden Expansion is a 55MW hydro power project. It is planned in Sermersooq, Greenland. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently at the permitting stage.

Greenland 5kw power station

The project also includes creating a new power station with two turbines next to the existing plant, as well as the construction of several access, transport and transverse tunnels. In addition to project management, ...
