

Greif solar Russia

Does Greif still operate in Russia?

Industrial packaging maker Greif Inc. continues to operate nine facilities in Russia, while condemning the Russian government's invasion of Ukraine. The Delaware-based manufacturer appears to have the most sizable operations in Russia among Central Ohio public companies, according to a search of Securities and Exchange Commission documents.

Where is Greif headquartered?

Greif headquarters are in Delaware. Industrial packaging maker Greif Inc. continues to operate nine facilities in Russia, while condemning the Russian government's invasion of Ukraine.

Is solar energy on the verge of a major expansion in Russia?

Vadim Braidov /TASS Solar energy in Russia might be on the verge of a major expansion, thanks to a government support program for renewable energy sources, industry experts told The Moscow Times. Russia, the world's fourth-largest emitter of greenhouse gases, has historically relied on its vast oil and gas reserves to bolster its economy.

Does Russia have enough solar energy?

"There is no sun there! Well, our data tells us differently." Moscow-based renewables company Unigreen Energy, which has received a government guarantee that it will be paid extra for the power it adds to local grids, said Russia has more than enough insolation-- solar radiation hitting an object -- to produce solar energy.

How many locations does Greif have?

Greif is a global leader in industrial packaging products and services with 244 locations across the globe, of which 199 are production sites. Our 12,458 colleagues work in over 36 countries, with our headquarters in Delaware, Ohio. During FY 2023, we generated more than \$5.2 billion in net sales.

Could a hybrid solar-diesel power station help Russia's Arctic settlements?

"Most Russian regions have high insolation -- above 1,000 -- the level required to generate energy," the company said in a statement. Both Unigreen and HEVEL experts said Russia's many Arctic settlements could benefit from hybrid solar-diesel power stations that would cut costs and solve supply chain and shortage problems.
