

The UNU-GTP is presently conducting a Short Course on Deep Geothermal Exploration in Kigali, Rwanda at the request of the Icelandic International Development Agency (ICEIDA) for the Energy, Water and Sanitation Authority (EWSA) of Rwanda.

Soon after the concept of plastic to fuel recycling was proven using a 2000kg per day capacity convertor, I-GRO Energy developed a commercial scale PoC in December 2022. Today, I-GRO successfully recycles 12000kgs of plastic and rubber every single day from industrial and residential waste found in outskirts of Uttar Pradesh.

Rwanda may have geothermal potential which is manifested in the form of hot springs (Fig. 1) and hosts two prospective zones for geothermal energy exploration: the first zone in the north-western region (Gisenyi, Karisimbi, and Kinigi) which is associated with volcanoes and the second zone in the southern region (Bugarama) associated with ...

Claver has more than 15 years of experience in energy sector and he is currently the Managing Director of Energy Utility Corporation Ltd (EUCL), a subsidiary of REG where he covers all business functions from power generation to the electricity retail. Utility is vertically integrated and single buyer at the same time.
