

Gti energy Saint Pierre and Miquelon

What makes GTI energy unique?

GTI Energy leverages the expertise of our trusted team of scientists, engineers, and partners to deliver impactful innovations needed for low-carbon, low-cost energy systems worldwide. We embrace systems thinking, open learning, and collaboration to bring solutions from concept to market, with more than 1,000 patents secured in our 80-year history.

What services does GTI Energy offer?

GTI Energy offers access to facilities, hardware, and support services to help you develop new energy and environmental technology. We are available to work confidentially with private industry partners to help you address technical challenges and hurdles.

What areas are GTI Energy patents available for?

GTI Energy patents are available for commercialization in various areas, including distributed energy, distribution and pipeline technology, exploration and production, energy utilization, gasification and gas processes, hydrogen and energy systems, and many others.

Why should you join GTI?

JOIN OUR JOURNEY To A CLEAN ENERGY FUTURE. EXPLORING. DISCOVERING. DELIVERING. GTI saw US domestic uranium supply collapse and anticipated the surge in demand for clean energy solutions. This led us to position GTI to be at the leading edge, to respond targeting ISR mining - a low-cost and environmentally friendly method of uranium mining.

Why did GTI choose uranium mining?

DISCOVERING. DELIVERING. GTI saw US domestic uranium supply collapse and anticipated the surge in demand for clean energy solutions. This led us to position GTI to be at the leading edge, to respond targeting ISR mining - a low-cost and environmentally friendly method of uranium mining. What is Insitu Recovery (ISR) Mining?

What is GTI Energy's Emerging Technology Program (ETP)?

GTI Energy's Emerging Technology Program (ETP) feeds utility energy efficiency programs by validating the performance, efficiency, and reliability of new equipment.

Despite a traditional reliance on fossil fuels, which exacerbates the economic vulnerability of the islands by exposing them to the volatility of the prices of petroleum products, most OCTs have ...

Gti energy Saint Pierre and Miquelon

GTI Energy provides access to facilities, hardware, and support services that can put you on the fast track to developing new energy and environmental technology. We are available to work confidentially with private industry partners to help you address technical challenges and hurdles.

Saint-Pierre-et-Miquelon is the final stopover for Energy Observer before her final transatlantic journey back to her home port of Saint-Malo in mid-June. Setting out from the "Cit#233; Corsaire" in 2017, Energy Observer has covered more than 65,000 nautical miles to date - the equivalent of circumnavigating the Earth three times.

As a leading technology development organization, we are focused on developing, scaling, and deploying energy transition solutions that improve lives, economies, and the environment. GTI Energy leverages the expertise of our trusted team of scientists, engineers, and partners to deliver impactful innovations needed for low-carbon, low-cost ...

GTI Fujairah FZC has set an innovative trend in oil storage industry by successfully completing the safe loading operation of fuel oil vessel through solar hybrid power. The landmark project completed in record 6 months" time will enable the terminal to generate 10 percent of its electricity through clean energy with an annualised reduction ...

Southwest Research Institute (SwRI), Gas Technology Institute (GTI), GE Global Research (GE) and the US Department of Energy/National Energy Technology Laboratory (DOE/NETL) have achieved a milestone on the supercritical transformational electric power (STEP) pilot plant with a ground-breaking ceremony.

Despite a traditional reliance on fossil fuels, which exacerbates the economic vulnerability of the islands by exposing them to the volatility of the prices of petroleum products, most OCTs have started actions in favour of a clear shift towards renewable energy, as well as improving energy efficiency in general.

GTI Energy leverages the expertise of our trusted team of scientists, engineers, and partners to deliver impactful innovations needed for low-carbon, low-cost energy systems worldwide. We embrace systems thinking, open learning, and collaboration to bring solutions from concept to market, with more than 1,000 patents secured in our 80-year history.
