Does Guam have a virtual power plant program?

Regulations are described in Guam Code § 8309. As per Guam Code § 8603, GPA must develop a Virtual Power Plant Program. The program would initially be capped at 20 MW and provide an alternative rooftop solar program to address the challenges of the Net Metering program. This program is currently under development.

Does Guam use fossil energy?

3 Guam has no fossil energy resources and meets nearly all of its energy needs--including the fuel for generating most of its electricity--with imported petroleum products. 4,5 However, Guam is increasing its use of renewable energy resources for electricity generation. 6,7

What data is available on Guam's energy sector?

Introduction This report summarizes the currently available data on Guam's energy sector as of December 2023. It describes primary energy consumption, end uses, energy production, relevant policies, and key challenges, including details on the electric power and transportation sectors.

How much energy does Guam use?

Conclusion Total energy consumption in Guam has been increasing over the past 12 years. In 2021, the island consumed 241 million gallons of imported fossil fuels. Of the total energy consumed on the island, less than 4% is supplied by carbon-free renewable energy.

Does Guam need to retire power plants?

Guam Power Authority is challenged by the need to retire power plants while reliably and affordably delivering power to its customers. The settlement of an EPA Clean Air Act violation requires GPA to retire older fossil-based generating plants while Renewable Portfolio Standards mandate a transition to carbon-free electricity.

Does Guam have electricity?

About four-fifths of Guam's electricity generating capacity runs on fossil fuels and the rest is fueled by renewables. The Guam Power Authority (GPA), a public corporation overseen by the elected Consolidated Commission on Utilities (CCU) and regulated by the Guam Public Utilities Commission (PUC), provides all of Guam's electricity.

In 2015, Guam's first commercial solar PV facility--the 26-megawatt Dandan solar farm with more than 120,000 solar panels--began operating. 56 The facility can generate enough electricity to serve an estimated 10,000 homes. 57 The 60-megawatt Mangilao solar farm came online in 2022, and the planned 41-megawatt Malojloj solar farm is scheduled ...

Guam facility solar

In July 2022 we acquired a 36.6 megawatt (MW) solar facility in Inalåhan, Guam, which includes the operating Dandan solar farm and rights to solar development pipeline on the island. The Dandan site, operating since 2015, is the largest solar asset on Guam, supplying 6% of the island's electricity generation capacity and renewable energy to ...

In July 2022, CleanCapital expanded its portfolio by acquiring the utility-sized, 36.6 megawatt (MW DC), "Dandan" solar facility located in Inalåhan, Guam. The site has ground-mount solar and is comprised of 52 ...

HAGÅTÑA (The Guam Daily Post) -- The Guam Power Authority is proposing to make some major changes to a power purchase agreement for a solar energy facility to save the project from being scrapped altogether and because it would help GPA meet consent decree requirements for renewable energy installations.

The Guam Power Authority wants to award two major contracts for solar farms in Dededo and Sånta Rita-Sumai, the first two in a series of projects which are anticipated to add a huge 330...

CleanCapital announced it has acquired a 36.6 MW operational solar project from developer GlidePath Power in Inalåhan, Guam. It is the company's largest asset acquisition to date and is also the largest solar facility on the island, providing about 6% of the grid's electricity demand.

Foremost Foods, Inc. (Foremost), Coca-Cola Beverage Co. (Guam), Inc. (Coca-Cola), the leading non-alcoholic beverage companies on Guam and in Micronesia, and IP& E Holdings, LLC., a ...

The Guam Power Authority will go after two contracts to add 192-megawatts worth of solar power generation to the electrical grid, with the Consolidated Commission on Utilities giving the OK ...

NEW YORK, July 25, 2022: Morgan Lewis represented GlidePath Power Solutions in the sale of a 36.6 megawatt (MW) solar facility in Inalåhan, Guam to CleanCapital. The transaction includes ...

The military and the Guam Power Authority are now looking at alternative sites to build a large solar farm because the original proposed site, on military land at South Finegayan, could be used...

In July 2022, CleanCapital expanded its portfolio by acquiring the utility-sized, 36.6 megawatt (MW DC), "Dandan" solar facility located in Inalåhan, Guam. The site has ground-mount solar and is comprised of 52 Advanced Energy 500kw central inverters and 121,792 modules, a mix of Trina and Canadian Solar modules.

CleanCapital announced it has acquired a 36.6 MW operational solar project from developer GlidePath Power in Inalåhan, Guam. It is the company's largest asset acquisition to date and is also the largest solar facility ...

Guam facility solar

In July 2022 we acquired a 36.6 megawatt (MW) solar facility in Inalan, Guam, which includes the operating Dandan solar farm and rights to solar development pipeline on the island. The ...
