

Guam solar wall battery

We offer home solar and battery storage across Guam protected by our leading 25-year warranty. Learn more about GU home solar panels, incentives, cost, tax credits, rebates, frequently asked questions, and savings.

Our Solar & Rechargeable Battery Systems not only shield you from escalating energy costs but also store solar energy in a backup battery. This ensures that during power outages, your lights remain on, your food stays fresh, and you can relax knowing that your energy needs are covered.

We were really happy with GoSolar Guam as well. Panels all stayed on during the typhoon, and with 4 batteries we could ALMOST live normal for the 29 days we didn't have grid power. I'd like to get two more batteries eventually but like you said - usually they are out.

Generation Renewable - Guam and Sunnova are now offering Solar Energy Systems with Battery Storage Systems. This means that your back up panel board in your home will have power even when utility power isn't available, like during power outages or during and after a storm.

Guam and Micronesia's source for residential and commercial green energy solutions. We design and build high-efficiency, cost effective solar panel systems. Lower your carbon foot print, increase the value of your home or business, and SAVE MONEY!
