

One of the 20 winners was the Advanced Thermovoltaic Systems (ATS) team, including Jake Perez, a RASEI alum. The ATS team was awarded the distinguished 2024 Earthshot "Fix Our Climate" prize for their transformative efforts against climate change.

Advanced Thermovoltaic Systems has received \$1m funding from The Earthshot Prize to scale its technology which captures industrial waste heat and converts it into electricity. The winner of the "Fix our Climate" category believes its technologies have the potential to save "gigatonnes" of carbon dioxide (CO2) and could be a "game ...

Founded in 2008, Advanced Thermovoltaic Systems, LLC (ATS) is developing a thermovoltaic device also known as a thermoelectric generator (TEG) to convert heat directly into electrical energy through the Seebeck effect. After more than 12 years of research, design, and development yield, ATS has patented its device.

Recognized by Prince William, Advanced Thermovoltaic Systems is transforming the future of energy with its groundbreaking solution to industrial waste heat ATS to receive £1 million to accelerate and scale the impact of their innovative environmental solution

Advanced Thermovoltaic Systems (ATS) has developed a simple, safe, and scalable technology to capture waste heat and convert it into electricity, offering a game-changing solution for heavy industries like cement and steel production.

Advanced Thermovoltaic Systems waste heat collection unit. Photo: Advanced Thermovoltaic Systems. The five winning projects of this year's Earthshot Prize have been announced. They include a technology designed to capture waste heat and convert it into usable and clean electricity, and a company providing sustainable refrigeration systems to ...

Canadian-based Advanced Thermovoltaic Systems (ATS) was recognised for its technology to capture and convert industrial waste heat into sustainable electricity without the need for moving parts. It won the "Fix Our Climate" Prize at this year's Earthshot Awards Ceremony, held last week in Cape Town, South Africa.

One of the 20 winners was the Advanced Thermovoltaic Systems (ATS) team, including Jake Perez, a RASEI alum. The ATS team was awarded the distinguished 2024 Earthshot "Fix Our Climate" prize for their transformative efforts against climate change. Chosen from 5,342 nominations across 141 countries, this prestigious award was recently ...

Initially investigating advanced materials the company could use for solar panels, the Advanced

Thermovoltaic Systems (ATS) team realised that its panels could generate electricity without light, only requiring waste ambient heat.

Advanced Thermovoltaic Systems (ATS) has developed a simple, safe, and scalable technology to capture waste heat and convert it into energy, offering a new and viable solution for heavy industries like cement and steel production. Altyn Dala Conservation Initiative: The Initiative is working to save the critically endangered Saiga Antelope from ...
