

Guernsey axiom energy

Will gas be a part of Guernsey's net zero future?

Gas will continue to have a place in the energy mix as it is vital for the success of our island's energy transition - and we plan to be a big part of Guernsey's Net Zero future so we can continue to provide energy for every generation. Guernsey Energy has been providing energy for every generation for almost 200 years.

Who is Guernsey energy?

From tailored payment plans and energy efficiency advice to priority callouts and safety checks, we're here to make things easier for you if we can. 2024 Guernsey Energy, a trading name of Guernsey Gas Ltd, a member of the Islands Energy Group. We've been providing energy solutions to the Channel Islands for almost 200 years.

What is Axiom Energy Group currently involved in?

Axiom Energy Group is currently home to both Engineered Concepts and Marathon Engine Systems, offering innovative clean energy solutions. Past projects have included telecom projects, cathodic protection, and emergency off-grid power.

What is Axiom Energy Group's mCHP?

Axiom Energy Group offers mCHP (Micro Combined Heat and Power) systems that make it possible for customers to generate clean power using affordable natural gas or propane.

Does Guernsey energy offer free priority care?

We offer free Priority Care for customers who need extra support. From tailored payment plans and energy efficiency advice to priority callouts and safety checks, we're here to make things easier for you if we can. 2024 Guernsey Energy, a trading name of Guernsey Gas Ltd, a member of the Islands Energy Group.

What is the energy transition in Guernsey?

In Guernsey, we currently rely on fossil-fuel based systems of energy production and consumption and operate a thermal power station. However, it is recognised that as part of the response to climate change, there is a need to transition to an energy mix with limited, if not zero carbon emissions. This is often referred to as the energy transition.

Provides heat & electrical power: ecopower produces 13,000 - 47,000 BTU's per hour of heat and generates 1.2 - 4.4kW per hour of electricity. Lowers energy bill: use the electricity created on site, reducing your utility bill, or send excess electricity back to the grid. Powered by a long-life engine: the Marathon Engine is rated for 40,000+ hours. ...
