

Guinea-Bissau commercial building solar panels

WASHINGTON, JUNE 6, 2024 - The World Bank's Board of Executive Directors approved a \$35 million grant to enable solar power generation and increase access to electricity in Guinea ...

International finance institution the World Bank will support the development of Guinea-Bissau's first solar power plants with a \$35 million grant through its Solar Energy Scale-up and Access project.

In addition, Guinea-Bissau is eligible for technical assistance and a line of credit to develop its market of off-grid solar home systems pursuant to the Regional Off-Grid Electricity Access Project (ROGEAP, P160708).

The World Bank, IDA, ESMAP, and GCF are funding Guinea-Bissau's first solar power plants with a \$78.15 million investment to support decarbonization and expand electricity access. The project will build solar plants near Bissau and install mini-grids on the Bijag#243;s islands, thereby providing electricity to 1,200 households and SMEs.

Harnessing Guinea-Bissau's abundant solar resources presents an efficient and cost-effective solution to addressing the country's energy deficit. The Solar Energy Scale-up and Access Project is slated to benefit residential, commercial, and industrial consumers nationwide, including those on the islands.
