Publication date: 2016, August Author: CENTURION Description: Guinea-Bissau is as much a frontier oil and gas country as it gets. With an exploration history dating back to the 1960s, discoveries remain elusive. However, new seismic studies and successes in neighboring regions should see the sector pick up pace, as the country recovers from a coup d'état that took place ...

The issue in Guinea Bissau lies in the lack of reliable and recent data points on energy mix. As of late 2018/early 2019, data on power plants, off grid and on-grid systems as ...

A study of this type was carried out in a Health and Demographic Surveillance System (HDSS) in Guinea-Bissau (Fisker et al., 2019) and should be conducted in other HDSS, including those located in ...

Off-grid Power Systems (OGPS) with renewable energy (RE) sources offer an alternative pathway to achieving total electrification in such circumstances [24]. The IEA, in a 2011 study, attested that the expansion of the grid is effective for urban areas and 30% of unelectrified rural areas [1]. The remaining 70% is best suited for off-grid systems.
