How can Haiti improve energy resilience?

In the face of these obstacles, Haiti is forging a path toward energy resilience with support from USAID and the National Renewable Energy Laboratory (NREL). Central to this effort is the development of energy modeling frameworks and trainings, microgrids, agrivoltaics, and off-grid solar power to enhance energy resilience and security in Haiti.

What type of energy is used in Haiti?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings.
