Hollandia Power's mission is to provide reliable, long lasting solar solutions. Our professional team includes Electrical Engineers, System Designers, Technicians and other skilled persons, all with a passion for solar and wind energy.

The hydrogen yield of 860 tons per year will be produced by a 16 MW electrolysis platform, stored under pressure in hydrogen storage tanks and then provide secure and 24/7 available electricity via high-power fuel cells in a reverse electrolysis process - enough to power 10,000 households in French Guiana at a competitive price compared to ...

The so-called CEOG Renewable Power Plant project is set to create a baseload renewable energy facility using hydrogen technology, HDF said on Wednesday. The complex will be capable of storing 128 MWh of power using long-term hydrogen storage and batteries for short-term storage.

These plants provide continuous or on-demand electricity from renewable energy sources (wind or solar), combined with high power fuel cells supplied by HDF. HDF has developed the world's first mass production plant for high-power fuel cells for energy, which will be commissioned in France in 2023.
