

# How to dismantle the photovoltaic panels of an electric four-wheeler

How do you dismantle a solar panel?

**Disconnect Electrical Components and Turn Off System Switch** off the solar electric system at the main utility panel. Then, individually unplug all electrical connectors on panels, disconnect the inverter and batteries, and label all wires clearly. With safety checks complete and the roof protected, it's time to dismantle the solar array:

Should you remove solar panels when not generating power?

**Cover the Solar Panel:** Even though you should disconnect solar panels at hours when they are not generating power, you should always try to cover them with opaque cloths before removing them. Doing this will ensure no solar generation, making it safer to disconnect the modules.

How to disconnect solar panels?

**Turn Off DC and AC Disconnect Switch:** As commented in the safety precautions, the first step when disconnecting solar panels is switching off circuit breakers.

How difficult is it to remove solar panels?

The difficulty of removing solar panels can vary depending on several factors, including the mounting system and the complexity of the installation. While some homeowners with proper knowledge and experience may be able to handle the removal themselves, it is generally recommended to seek professional assistance.

How to remove MC4 connector from solar panel?

**Disconnect the MC4 Connector of Each Solar Panel:** After everything is ready for disconnection, unplug the MC4 connector at the end of each solar panel. You can easily do this by using the disconnection/connection tool for MC4 connectors. If you lost it or did not have it at hand, you can always use a socket wrench to replace it.

How long does it take to remove solar panels?

With 2-3 installers, plan for solar panel removal to take 1-2 full working days including roof repairs. The exact timeframe depends on system size, mount types, and access challenges. Can I remove solar panels myself? While DIY removal is physically possible, it's highly risky unless you have professional training.
