

How to install solar panels in a villa

How do I install a solar panel?

Installing your solar panel is a straightforward process though calling in professional installers is recommended. Making sure these installers are accredited by MCS is highly important, so as to ensure a high standard of installation. A solar panel will be most effective if you have a south-facing roof.

What is a DIY solar panel installation?

DIY installations allow you to customise your solar panel system to match your home's energy needs and roof layout (or perhaps even a balcony). Some professional installations may offer limited options, while a DIY approach allows for optimising panel placement, choosing specific components, and tailoring the system for maximum efficiency.

Can a DIY solar panel installation save you money?

Embarking on a DIY solar panel installation can be rewarding, offering significant cost savings and a better understanding of your home's energy systems. We'll help guide you to simplify the process, from initial planning and preparation to the final steps of connecting your system to the grid.

Can you install solar panels on a roof?

Most DIY home solar panel installations in the UK are roof mounted. As long as you're happy up a ladder, the process isn't as difficult as you might imagine. We recommend planning in advance where you'll put the panels to determine where you need to install the frames and brackets. It's a lot easier when you have a plan!

Can I install my own solar panels?

Although DIY options are available, hiring a professional solar company is best to ensure your panels are correctly and safely installed. Yes, it's possible to install your own solar panels. However, DIY installations require electrical skills and advanced knowledge of solar energy that most DIYers don't have.
