Our range of solar accessories covers everything you need to create a bespoke solar panel system. Everything you require from replacement 12V low energy bulbs and holders to solar power inverters, charge controllers, UV stabilised cable and solar panel mounting brackets.

What is a solar panel mount?

The purpose of a solar panel mount is to serve as a foundation for a solar panel. Mounting systems allow for solar panel arrays to be positioned in the most effective location to maximize the panel's exposure to sunlight. The type of solar panel mounts will vary widely depending on the rooftop or surface type where it is being installed on.

Do solar panels need mounts?

Solar panel mounts are a common component of almost every solar panel array. Although there are newer solar panel technologies coming out that do not require mounts, such as the Lumeta solar module that are being developed, the majority of solar panel arrays on the market and the ones already installed will require this feature.

What is solar panel mounting & racking?

What is Solar Panel Mounting and Racking? Mounting solar panels refers to the process of installing solar energy systems onto a structuresuch as a building or ground mount. The procedure usually involves securing the panels with a racking system on the rooftop or ground and connecting the system to the power grid.

3. Make space for the solar panel accessories (solar inverter, cables and solar batteries, if desired), for instance in a plant room. 4. Plan a day for installation. 5. Erect the scaffolding (this can be done by your supplier or by ...
