Hpe smart storage battery 1 firmware Taiwan

What is the HPE Smart Storage Battery?

The HPE Smart Storage Battery is a lithium-ion,low-halogen centralized backup sourceand is required to back up the write cache content onto flash memory on the HPE Smart Array Gen9 and newer storage controllers in case of an unplanned server power loss.

How many batteries does a HPE smart storage hybrid capacitor need?

Only one batteryis required per server as it can support multiple devices. The HPE Smart Storage Hybrid Capacitor is a battery-free technology for power storage that provides data protection for cached data while eliminating costs and environmental impact of lithium-ion batteries.

What is HPE smart hybrid capacitor?

For those running HPE Gen10 servers,the HPE Smart Hybrid Capacitor is a centralized backup power sourcesupporting multiple controllers where the NAND flash memory on HPE Smart Array Performance Class controllers and the HPE Smart Hybrid Capacitor work together to save cached data in the event of unplanned server power loss.

What's new in smart array controller firmware?

The Smart Array Controller firmware has been hardened to reduce the likelihood of these false error messages occurring: Enhancements/New Features: Servers now power up fasterdue to improvements in the UEFI controller driver. Logical volume transformations are allowed on controllers without data preservation.

This type-a modular controller occupies a dedicated storage slot without occupying a PCIe expansion slot. The Gen10 controllers are supported by the HPE Smart Storage Battery. The HPE Smart Storage Battery supports multiple devices and is sold separately.
