Does reflect Orbital sell sunlight from space?

Reflect sells sunlight from space. Reflect Orbital received investment from Sequoia, marking Sequoia's first space investment since SpaceX. Where is Reflect Orbital's headquarters? Reflect Orbital is located in Santa Monica, California, United States. Who invested in Reflect Orbital?

Where is reflect Orbital located?

Reflect Orbital is located in Santa Monica, California, United States. Who invested in Reflect Orbital? Reflect Orbital has 10 investors including Keenan Wyrobek and Baiju Bhatt. How much funding has Reflect Orbital raised to date? Reflect Orbital has raised When was the last funding round for Reflect Orbital?

Can a city use reflect Orbital to buy sunlight?

Cities can contract with Reflect Orbital to literally purchase sunlight for their areas. It'll be interesting to see how bright the light is and how residents would respond to daylight shining down on their cities for more hours in a day, but there are some special use cases where this could add a ton of value.

Who is reflect Orbital?

After graduating, he worked as Director of Engineering at Tri-D Dynamics and Mechanical Engineer at Zipline. Reflect Orbital started as a typical 4am spreadsheet binge, and as the problem was refined and the opportunity became overwhelming Ben quit his job and partnered with Tristan to create an enormous company.

When did reflect Orbital close?

Reflect Orbital closed its last funding round on Sep 23, 2024 from a Seed round. Who are Reflect Orbital's competitors? Alternatives and possible competitors to Reflect Orbital may include Electra, Doral Renewables, and Ambri. Reflect sells sunlight from space.

Dr. Erkin Sidick spent 20+ years as a Senior Optical Engineer at NASA-Jet Propulsion Laboratory (JPL) where he focused on space telescope projects used for direct detection of exo-planets, in the areas of optical design, integrated modeling and optical simulations, metrology, wavefront sensing and control, seismic imaging and atmospheric refraction.

A former SpaceX executive plans to keep solar farms running at night, using sunlight from space, reflected off an array of orbiting satellites. The startup is aptly named Reflect Orbital, and the company would provide short periods of "Sunlight-as-a-service from space." Ben Nowack is the CEO of Reflect Orbital, a former propulsion engineering intern

Reflect Orbital plans to launch a constellation of satellites equipped with mylar reflectors to reflect the sun's light down onto solar farms when the sun doesn't normally shine.
