

I-eco solar Norfolk Island

Does Norfolk Island have too much solar energy?

That's pretty impressive given its remoteness and a population of 1,849. But this uptake has also caused some headaches in managing Norfolk Island's electricity network, with too much solar energy goodness generated at times. The Tesla battery system installed in December 2020 has helped out on that front.

How many solar panels are there in Norfolk Island?

44 km of high and 44 km of low voltage cabling. Distributed household rooftop PV systems. There have been more than 555 small-scale solar power systems installed on Norfolk Island, with a collective capacity of 1,770 kW. That's pretty impressive given its remoteness and a population of 1,849.

Who is I-eco solar?

I-ECO Solar is a South-African based company that specializes in the mechanical assembly of Solar Photovoltaics solutions of various solar racking systems for carports, roof tops and ground mounts, with a specialisation in the world-renowned tracker structures.

Where is the Drovers Solar Farm - Island Green Power located?

The Drovers Solar Farm - Island Green Power is in the early stages of developing a new solar project located on land north of Swaffham and south of Castle Acre, West Norfolk. Island Green Power is in the early stages of developing a new solar project located on land north of Swaffham and south of Castle Acre, West Norfolk.

Does Norfolk rely on diesel?

Like many island communities, Norfolk has traditionally relied on diesel for electricity generation. The community is in the process of shifting entirely to much cheaper and cleaner renewable energy, but that transition can't happen fast enough.

Where is Norfolk Island?

Norfolk Island is a tiny island (3,455 hectares) in the South Pacific Ocean. While an Australian Territory, it's much closer to the Kiwis than us - approximately 1,400 kilometres directly east of Evans Head in NSW compared to around 760 kilometres from NZ's Cape Reinga.
