

Can RDK create a new economic pillar for Curaçao?

The globally implemented energy transition and the growth of circular economy-focused activities offer the opportunity to create a new economic pillar for Curaçao. Rdk sees significant potential to develop and lease its properties to investors interested in establishing innovative, sustainable, and environmentally friendly industries on Curaçao.

What is happening in Curaçao's e-mobility park?

Currently, the initial phase involves land remediation and road construction. One of the first projects to be established in this park is the "e-Mobility project," which, in close collaboration with the Curaçao Bus Company, will include a 1MW solar park, six electric buses from the Curaçao Bus Company, batteries, and a power management system.

Why is the Eurasian Economic Community launching large-scale projects & research programmes?

The Eurasian Economic Community is now rolling out large-scale projects and research programmes. Due to its geopolitical and territorial features, especially the availability of isolated and inaccessible territories, development and implementation of renewable energy technologies has huge prospects for the future.

What is RDK doing in Curacao?

Rdk is also closely cooperating with various government owned NVs (public limited liability companies) and ministries to jointly establish a sustainable hydrogen production chain on Curaçao. A local newspaper in English that serves investors, local English speaking residents, stays over tourism and generally all residents of Curacao.

Why is the United energy system of Central Asia important?

For a long period, the efficient operation of the water and energy complex of the region was ensured by the Soviet model of cooperation, where the key element was the United Energy System of Central Asia (CAUES). The CA water and energy complex was formed and developed in a complex manner, as an important component of the united CA economic region.
