

Ingeteam, whose head office is near Bilbao, has deployed systems for numerous co-located projects in the last few years. In 2020, it supplied a 50MWh system at a large wind farm in Scotland while in 2022 it has deployed units at green hydrogen and solar-plus-storage projects, both on home soil.

Spanish electrical engineering company Ingeteam SA announced today that it has been selected as the technology partner to supply and assemble a 70-MW/340 MWh battery energy storage system (BESS) in northern Italy.

Ingeteam's Containerized Battery Energy Storage System (BESS) provides a high efficiency compact hybrid power solution for electric propulsion vessels. Ingeteam's BESS is a compact battery storage solution controlled by an optimized energy management system that enhances vessel's power plant capabilities.

Spain-headquartered Ingeteam has landed a deal to provide power conversion system (PCS) equipment for a solar-plus-storage in Chile with, according to its developer Grenergy, the world's largest BESS.

Besides, it features the same technology as Ingeteam's PV inverters, facilitating the supply of spare parts. Advantages of DC-coupling The main advantage of a DC-coupled system is that the regulatory requirements are lower than the ones needed for an AC-coupled solar-plus-storage system, as there is no need to prepare an interconnection study .

-Predictable PV+BESS production: The BESS is connected in the boundary of the PV plant and receives the

## Ingeteam bess Grenada

real-time PV production. The power station automatically changes the active power according to the PV production variations to ensure a PV+BESS predictable power production in the common point of connection at the Syhaslm- 33/11kV substation.

Spanish electrical engineering company Ingeteam SA announced today that it has been selected as the technology partner to supply and assemble a 70-MW/340 MWh battery energy storage system (BESS) in ...

Ingeteam's experience in power electronics equipment (more than 25 GW installed), together with our in-depth knowledge in the field of protection and control, make our INGEGRID(TM) turnkey solutions the best option for resolving problems associated to the grid and its functioning both in the field of generation and consumption and in energy ...

Ingeteam's BESS turns any standard electric propulsion vessel into a latest generation hybrid-electric propulsion vessel. Ingeteam's BESS offers a compact and optimal solution, suitable to be installed in a newly built vessel or to upgrade standard electric plant.

Ingeteam will also supply 15 power stations with inverters and an accompanying PV inverter controller and SCADA (supervisory control and data acquisition) system. It recently delivered a 3MW/9MWh BESS for Spain's first solar-plus ...

Ingeteam is a market leader specializing in electrical engineering and the development of electrical equipment, motors, generators and frequency converters. It deploys its products in four main sectors: Energy, Industry, Marine and Railway traction,

Ingeteam's BESS is a compact battery storage solution controlled by an optimized energy management system that enhances vessel's power plant capabilities. Ingeteam's BESS turns any standard electric propulsion vessel into a latest generation hybrid-electric propulsion vessel.

The StringStation has been conceived to enable and optimize the use of Ingeteam's INGECON<sup>®</sup> SUN STORAGE 350TL inverters, ensuring a perfect connection between the BESS plant and the grid. This turnkey solution is ...
