

Install solar panels to generate electricity in my hometown

Should you install a DIY solar panel?

DIY solar panel installation is an accessible way to lower bills, reduce carbon footprint, generate renewable electricity and gain self-sufficiency with the reassurance of knowing you'll always have additional energy to rely on when the sun is shining, even when you're not connected to mains electricity.

Can a DIY solar panel installation save you money?

Embarking on a DIY solar panel installation can be rewarding, offering significant cost savings and a better understanding of your home's energy systems. We'll help guide you to simplify the process, from initial planning and preparation to the final steps of connecting your system to the grid.

How do I start a DIY solar panel installation?

Kicking off your DIY solar panel installation begins with detailed planning and preparation. Calculate your home's energy needs to identify the required size and number of panels. Assess your roof for suitability - orientation, shading, and structural integrity are all key factors. Become familiar with local codes and secure any necessary permits.

How are solar panels installed?

We use a safe and strong installation method that uses friction to hold the rail and the edge of the solar panel securely in place. This system has been tested for heavy rain, hail and even hurricanes, so you know it's reliable. The panels are then laid on top of the rails, ready to be connected.

Should you buy or rent a home with solar panels?

With 69% of people telling our National Home Energy Survey that they're likely to buy or rent a home with solar panels, now is a great time to go solar. And if you're ready to get solar panels on your roof, it's never been simpler to compare prices with our easy-to-navigate tool.

How do I choose a solar energy installer?

Look for installers that have a proven track record and check if they are accredited by relevant industry bodies, such as the Microgeneration Certification Scheme (MCS) and/or the Renewable Energy Consumer Code (RECC).
