What is needed to install solar panels on UK homes?

Here's a quick guide to what's needed to install solar panels on UK homes: An installer should visit to determine if the property is suitable for solar panels. They will look at the size and orientation of the roof to decide the best location and angle for installing panels.

Do you need planning permission to install solar panels?

Current rules that require businesses to apply for planning permission if solar panels will generate more than one megawatt of electricity will also be scrapped, meaning organisations will be able to install more solar panels on rooftops without the delay and cost of applying for planning permission.

Can I install solar panels myself?

While it's technically possible to install solar panels yourself if you have the necessary qualifications, we recommend you use our MCS-accredited installers who specialise in safe and professional solar panel installations. Solar installations must be: Completed by a registered and certified electrician.

Are solar panels a legal requirement for new homes?

Even though installing solar panels on new builds is a great way to set new homes up with renewable energy from day one, it's not yet a legal requirement. One common problem is that developers don't use all the available roof space, resulting in a less effective solar panel system.

How many solar panels can I install?

The number of solar panels you can install depends on your electricity needs and available space. For a standard 3-bedroom house, a package priced at £6,650 includes: Size: the more panels you have, the more energy you can generate. On average, a system occupies around 15-20m<sup>2</sup> of roof area.

Should solar panels be included in new buildings by 2025?

And a YouGov poll of 107 MPs in January 2024 revealed that 79% of them advocate for the inclusion of solar panels in all new constructions by 2025, signalling a push for further environmentally-friendly building regulations. In March 2024, the European Parliament approved a law requiring solar panels on all new residential buildings by 2030.
