How do I install a solar panel?

Installing your solar panel is a straightforward process though calling in professional installers is recommended. Making sure these installers are accredited by MCS is highly important, so as to ensure a high standard of installation. A solar panel will be most effective if you have a south-facing roof.

How do I design a solar PV system?

When designing a solar PV system, there are a number of important factors to consider: Orientation - the direction the system will face (e.g. south, east/west). For existing buildings with sloping roofs, this is clearly fixed and will influence the viability of installing solar (north-facing is not worthwhile in the UK).

Can I install solar panels myself?

You can install solar panels on your home yourself. You will need some electrical wiring experience, and we suggest that you also use a professional solar contractor or electrician to do the wiring and connection processes to ensure that you: Do not start an electrical fire that damages or destroys your home, solar array, and solar components.

How much does it cost to install solar panels?

For a 2,000 square foot home, expect solar installation to run from \$10,000 - \$20,000. Other factors affect pricing, such as the size of the system, demand, etc. Some installations may be less expensive. What are the dangers of installing solar panels?

Can a solar panel be installed on a south-facing roof?

A solar panel will be most effective if you have a south-facing roof. This will ensure maximum sunlight reaches the panel. You will also have to make sure that your roof can support a panel, and that it has a large enough area for panel installation. Under Permitted Development Rights, you won't require formal permission to install a solar panel.

How does a solar panel installation work?

The installers start by setting up mounts, ensuring that the solar panel remains securely fastened to the roof and protects it from potential damage in bad weather. This is done by lifting some roof tiles in order to fix anchor points to the rafters. To these roof anchor points are attached the solar panel mounting system.
