Will totalenergies build a solar power plant in Iraq?

French energy major TotalEnergies will build a 1-gigawatt solar power plant in Iraq as part of a cluster of contracts it was awarded in 2021 for an integrated project that entails a total investment of \$27 billion over 30 years.

Does Iraq need solar energy?

Iraq has abundant untapped solar resources that could allow it to achieve its target and reduce reliance on imports of electricity. Additionally, the cost of electricity powered by solar energy is lower than that of oil- or gas-fired energy.

How much solar power does Iraq have in 2023?

According to the latest statistics by the International Renewable Energy Agency, it had just 1,599 megawatts of renewable energy capacity at the end of 2023. Iraq has abundant untapped solar resources that could allow it to achieve its target and reduce reliance on imports of electricity.

How much solar capacity will Iraq have by 2030?

Iraq's solar plans announced in November 2021 call for the addition of 12 gigawatts of solar capacity by 2030. Some 7.5 gigawatts of the planned solar capacity are to come from utility-scale solar plants, and Iraq has reached agreements with developers - at varying stages - for projects that will add 4.5 gigawatts of the total.

Why does Iraq have a poor electricity supply?

Iraq's inadequate electricity supply has been a drag on economic growth and a source of social instability. The problem is getting worse as the electricity supply is unable to meet rising demand due to rapid population growth. To make up the shortfall, Iraqis have had to resort to private generators that are expensive and cause pollution.

Who is QHC solar?

QHC SOLAR (Qimam himreen company) is a national company and was established to provide these solutions. With a global installed base on world wide relations, we believe that solar power is now a mainstream, viable technology of 'today' enabling the move towards a zero-emission power supply.
