

What is the Iraq-French energy deal?

Image Credit: Bloomberg Baghdad: Iraq and French oil major TotalEnergies on Monday signed a long-delayed \$27 billion energy deal that aims to increase oil production and boost the country's capacity to produce energy with four oil, gas and renewables projects.

Is foreign help enough to fix Iraq's energy problems?

Foreign help is not enough to fix energy issues, domestic reform is necessary. This past July, Iraq and France's TotalEnergies finalized the Gas Growth Integrated Project, a \$27 billion energy deal aimed at Iraq's natural resources and improving the country's electricity supply.

What is Iraq's gas growth integrated project?

We compliment Iraq and Total Energies on the signing of a \$27-billion energy deal that will accelerate Iraq's path to energy self-sufficiency and advance Iraq's collective climate change objectives. Years in the making, the Gas Growth Integrated Project aims to capture flared gas and deploy renewable energy sources.

What does the TotalEnergies deal mean for Iraq?

The TotalEnergies deal aims to help Iraq harness the natural gas emitted by its oil wells, achieve a more balanced energy portfolio, and address some of its domestic electricity shortages. It would also be significantly cheaper for Iraq to harness its own gas rather than to continue with its current agreement with Iran.

Why does TotalEnergies have a crisis in Iraq?

Recently, Iraq has become more critical for the gas company as TotalEnergies projects in Iran (negotiated in the late 1990s) and Syria (negotiated in 2008) are on hold because of sanctions.

Should Iraq trade oil for Iranian gas?

According to Prime Minister Mohammad Shia al-Sudani, by trading Iraqi oil for Iranian gas, Iraq would avoid power cuts in the summer while working on the deals to complete gas capture and extraction projects that would help make the country self-sufficient.

The solar power plant in Iraq will be developed in phases and will come online between 2025 and 2027. State-backed QatarEnergy and France's TotalEnergies have signed an agreement to develop a solar power plant as part of the gas growth integrated project (GGIP) in Iraq. The two companies will equally own the project, but the agreement is subject to ...

In 2022, Iraq relied on fossil fuels for 98% of its electricity generation. Its emissions per capita were slightly above the global average. Gas generation increased 105% year-on-year, as a new gas power plant came online.. Iraq generates less than 3% of its electricity from hydro, and less than 1% from solar and wind.

A multibillion-dollar agreement signed with France's TotalEnergies could help resolve Iraq's longstanding electricity crisis. Iraq moves toward easing its energy crisis with \$27B TotalEnergies deal, but challenges ...

By John Lee. The National Energy Services Reunited Corp. (NESR) has announced the inauguration of its flagship "Carbon Light" oilfield brine plant in North Rumaila. The project and opening ceremony were conducted with Basra Energy Company (BECL), the company set up on 2021 to operate the Rumaila Operating Organization (ROO).

Figure 3: Iraq has steadily gained market share in China as local refiners import more Basra crude types. Of course, Iraq is not Venezuela, and to date has managed to retain significant foreign investment in its energy sector, driving up production and exports of Basra crude, which China finds increasingly suited to its east coast refiners.

about 38.4 million,

Signed in September 2021, the GGIP has for main purpose to enhance the development of Iraq's natural resources to improve the country's electricity supply. According to these agreements, TotalEnergies and its ...

Capturing flared gas is vital for Iraq's energy independence plans. Despite progress in natural gas production from both non-associated gas and capturing associated gas, Iraq remains the second-largest gas flaring country in the world. "It would be a major achievement if Iraq's plans to increase gas production materialise by the projected ...

This is important because energy use is around 50% of the cost structure for desalination and Iraq continues efforts to reduce "barrel burn" in thermal power plants to free up oil for export. While the burning of fuel is used for MSF, both MSF and RO have high electricity requirements but even by this metric, RO is more efficient.
