

## Is it okay to install photovoltaic panels in the house

#### Can solar panels be installed on a house?

Solar photovoltaic (PV) panels can be installed on a wide range of homes. We've heard from people installing solar panels on bungalows and terraces, as well as semi-detached and detached houses. If your main house roof is unsuitable (a thatched roof, for example), solar panels can instead be installed on a garage or other outbuilding.

#### Should you install solar panels again if you move home?

Imagining your house filled with mess from a lengthy installation could be enough to put you off considering solar panels. But few owners complained to us about the installation being disruptive, and 80% said that they'd install solar panels again if they moved home.

#### How to install solar panels?

Make space for the solar panel accessories (solar inverter, cables and solar batteries, if desired), for instance in a plant room 4. Plan a day for installation 5. Erect the scaffolding (this can be done by your supplier or by a company you organise) 6. The solar panel mounts will be installed 7. The professionals will install the solar panels 8.

#### Can solar panels be installed on a roof?

Your installers will usually need to erect scaffoldingto install solar panels on your roof. Once this is up, solar panels can be installed in a day or two. The inverter will usually be fitted in either a loft or garage. This converts the DC your panels produce to AC that you can use in your home.

#### Do you own solar panels?

You OWNthe solar panels. Under these schemes, you pay for solar panels over a fixed period, say 20 years. There are no upfront costs, and instead you pay a monthly fee, which usually covers the solar panel and battery installation, repairs and maintenance.

#### Do you need a solar panel system to be energy independent?

If you want to be fully energy independent, you will need more panels and a solar battery big enough to store the excess energy you generate. As long as you install a solar panel system powerful enough to cover your household's energy usage, you can rely on solar electricity for all your energy needs.
