

Is it okay to install solar power now

Should you get solar panels?

There's no easy, one-size-fits-all answer to whether you should get solar panels, but there are some certainties. Provided you've got an appropriate roof for it, a solar installation will save you money on your electricity bills. And on sunny days, a well-sized installation will earn you a small amount extra for the electricity you export.

Should you install solar panels again if you move home?

Imagining your house filled with mess from a lengthy installation could be enough to put you off considering solar panels. But few owners complained to us about the installation being disruptive, and 80% said that they'd install solar panels again if they moved home.

Why should you install solar panels?

Installing solar panels lets you use free, renewable, low carbon electricity. You can sell surplus electricity to the grid or store it for later use. According to low-carbon certification organisation MCS, there were more than 183,000 solar panel installations across the UK in 2023.

Are solar panels a legal requirement for new homes?

Even though installing solar panels on new builds is a great way to set new homes up with renewable energy from day one, it's not yet a legal requirement. One common problem is that developers don't use all the available roof space, resulting in a less effective solar panel system.

Can you install solar panels on your roof?
