

Is it safe to install photovoltaic panels on the terrace

Where should solar panels be installed on a terraced house?

On terraced houses, because of the limited space, the solar panels will need to be installed either on the front or the back of the property. One thing you should consider when making this decision is not the aesthetics, but the side of the roof that will get the most sun.

Are terraced homes a good choice for solar panels?

But, as the solar power revolution grows, more and more terraced home owners are opting to install solar power systems in their homes. In fact, terraced houses are quickly becoming one of the most popular property types for solar panel installation, nationwide. So, the simple answer to the question, is yes! But what are the considerations?

Can solar power be installed on a terraced house?

So, the simple answer to the question, is yes! But what are the considerations? Terraced houses typically have less roof space than a semi-detached or detached property, especially when the space is also occupied with a chimney. This means that some of the larger solar power systems, with an output above 5kw, simply won't fit in the space.

Can solar panels be installed on a house?

Solar photovoltaic (PV) panels can be installed on a wide range of homes. We've heard from people installing solar panels on bungalows and terraces, as well as semi-detached and detached houses. If your main house roof is unsuitable (a thatched roof, for example), solar panels can instead be installed on a garage or other outbuilding.

Do you need planning permission to install solar panels on your roof?

An increasing number of people are investing in solar energy. More and more homes are having solar panels, or solar tiles, installed on their roofs. Of course, with such installations, the topic of planning permission and building regulations often comes to the surface.

Can I install solar panels if I don't meet building regulations?

Your local authority can also apply for a Confiscation Order to take away any money you've earned with your system - so there's absolutely no benefit to installing solar panels that don't meet building regulations. It's crucial that your solar installation follows all building regulations.
