Do solar PV panels need to be cleaned?

That said, most solar pv panels in the UK will not need any heavy-duty cleaning because regular rain will wash most dirt and grime off the surface, dispelling one of the myths about solar being its difficulty to clean.

How to clean a solar panel?

Many cleaning products are too abrasive for solar panels or may leave a residue that blocks sunlight, so you should choose these carefully. Try mixing a mild detergent in water, slowly adding more cleaner if you need more cleaning power. The last step in solar panel cleaning is to dry the glass and review your work.

Should you filter water before cleaning a solar panel?

These could leave behind smears as the water dries, reducing your panels' efficiency, so you may want to filter your water before cleaning with it. If you're working on a hot day, avoid using cold water, too, as the dramatic temperature shift could cause the glass to crack. Instead, use warm water and try to clean on a relatively cool day.

Is it safe to clean solar panels from the ground?
