

Isle of Man -Future Energy Scenarios This report has been prepared specifically for and under the instructions and requirements of the Isle of Man Government under an appointment dated 16 December 2020, and a subsequent extension agreed on 03 June 2021, in connection with the development of Future Energy Scenarios.

In December 2020, the Isle of Man Government launched its Future Energy Scenarios Strategy to determine the pathways to meet the following: Electricity generation is responsible for approximately 33% of all greenhouse gas emissions on the Isle of Man, and a majority of this is currently sourced from fossil fuels (natural gas).

An updated energy strategy outlining the Isle of Man's pathway to achieving net-zero carbon emissions by 2050 will go to Tynwald this week. The Energy Strategy 2024 builds on the Tynwald-approved 2023 plan, which sets out the government's policy direction and reaffirms its commitment to increased energy independence, meeting net-zero targets, and ...
