You can find more information on this subject in our Cookies Policy VINCI Energies UK & ROI is a community of incredible people empowered to deliver the promises of the digital and energy revolutions.

Will the Isle of Man have a decarbonised electricity supply by 2030?

The Isle of Man Government aims to have a decarbonised electricity supply by 2030, as part of its goal to be net zero by 2050. Chief Minister Alfred Cannan MHK said: 'The Council of Ministers welcome the update and strongly support these significant projects.'

Will a wind farm deliver a third of the Isle of Man's electricity needs?

Plans to build a wind farm capable of delivering around a third of the Isle of Man's electricity needs by 2026 are on schedule. Manx Utilities updated the Council of Ministers last week and outlined potential sites for the 20MW windfarm, alongside plans to install 10 Megawatts of solar on public buildings.

Will Manx Utilities build a windfarm at earystane plantation?

With the aim of complementing the existing power system assets operated by Manx Utilities, the proposed windfarm design, at Earystane plantation, would consist of between three and four turbines which could generate more than a quarter of the Island's annual electricity needs.

The Isle of Man Government aims to have a decarbonised electricity supply by 2030, as part of its goal to be net zero by 2050. Chief Minister Alfred Cannan MHK said: "The Council of Ministers welcome the update and strongly support these significant projects."

We're working with the Isle of Man to support its ambitious renewable energy and net-zero emission targets - and achieve all the social, economic, and environmental benefits that can come with that.

5 ???&#0183; A VINCI Energies solution, Portugal. 100 % Og&#234;o. 100% Og&#234;o is a choice of high-performance aggregates combining primary resources (from quarries) and secondary ones (from earthworks and deconstruction). The proportion of recycled materials varies according to the quality and quantity of secondary materials available in the area.

5 ???&#0183; VINCI Energies helps electricity producers, transmission and distribution system operators and local and regional authorities fulfil the promise of the energy transition by fostering access to electricity, ensuring secure supply and developing sustainable energy.

VINCI Energies is an international business with strong regional roots and an agile and innovative structure. Our 2,000 worldwide business units make energy, transport and communication infrastructure, factories, buildings and IT systems more reliable, safe, sustainable and efficient.

6 ???&#0183; VINCI Energies, a specialist in port decarbonisation . VINCI Energies has been involved in implementing more than 40 OPS systems in Sweden, France, Norway, the United Arab Emirates and other countries around the world, which have significantly improved quality of life in nearby cities by reducing noise levels as well as emissions.
