

It s hard to get money to install photovoltaic panels

Should you invest in solar panels?

You can get free electricity with solar panels, which can significantly reduce your utility bills. Plus, you can make money by exporting spare energy to the National Grid. Whether or not to invest in solar panels is a decision that should be made carefully, and we recommend you get advice from a solar expert.

Are solar panels worth it?

If you're ready to save some cash, while you help save the planet, take a look at the solar panel stats and weigh up the pros and cons of solar panels for yourself to see if they will be worthwhile. Solar panels are very energy-efficient and reduce reliance on the National Grid.

How much does it cost to install solar panels?

You can usually expect to pay between £300 for each day of solar panel installation. Usually, there will be two people installing your system, which comes to around £600 per day. Solar panels are usually installed on your roof in a single day, but larger systems will often take more than one day to install, which can cause labour costs to climb.

Can a solar PV system save you money?

The most robust information available on potential solar PV savings comes from the Energy Saving Trust. Based on a 3.5kW solar panel system costing £7,000 to install, and current energy prices (Oct 2023), its research suggests households who are at home all day can save up to £525 per year with the SEG, versus £400 without.

Do solar panels add value to a house?

Boosting your rating from F to C, for example, can increase the value of your home by up to 15%. Our Energy Experts also found that installing 10 solar panels can increase your EPC rating by 1 band. For a 3-bedroom semi detached house, installing 10 solar panels would cost approximately £6,300. But they could add much more value than they cost.

Do you need a solar panel installer?
