How will italtvolt support Italy's Green industrialisation ambitions?

Italtvolt intends to honour Italy's important industrial legacy by supporting the country's green industrialisation ambitions, and by delivering battery cells which will help drive decarbonisation across a variety of industries. Italtvolt's 45GWh battery plant will be the Italy's largest, independent, battery cell factory.

What is Italy's largest battery cell factory?

Italtvolt's 45GWh battery plant will be the Italy's largest, independent, battery cell factory. The battery cell factory will focus on creating new opportunities for re-skilling and upskilling workers from Italy's automotive industry.

Is Italy a good place to start a battery industry?

Today, Italy holds significant opportunity for the modern battery industry, with its strategic location and highly skilled workforce. Italy has a rich industrial heritage, especially as a hub of Europe's automotive industry, offering access to a large, skilled workforce.

Where is italtvolt battery factory located?

Italtvolt has made a strategic decision to locate its battery cell factory in Italy, the country where Alessandro Volta invented the battery in 1800. Today, Italy holds significant opportunity for the modern battery industry, with its strategic location and highly skilled workforce.

Where is stellantis battery technology center located?

State-of-the-art, EUR40 million Battery Technology Center at Mirafiori complex in Turin, Italy, enables in-house testing and development of EV battery packs for upcoming Stellantis brand products. With 8,000 square meters and 32 climatic test cells, it is the largest Battery Technology Center in Italy and one of the largest in Europe.

What is BMW ipcei on batteries?

BMW's project targets within the framework of „IPCEI on Batteries" are design (including definition of cell chemistry), development, prototype production and testing of a highly innovative generation of Lithium ion battery cells. Therefore, several battery cells sample prototypes are built, tested and analyzed.

For more than 10 years Podium has engineered and built advanced battery systems for motorsport, automotive, aerospace, marine and railway applications. With a voltage level that ranges from 400 up to 800 V and beyond, Podium's ...

## Italy advanced battery technologies

Podium Advanced Technologies can rely upon a wealth of proprietary intellectual capital, as well as on an unrivalled mastery of any leading edge or emerging technology in our fields of application. In 2013 we have developed our own Battery Management System, that has been customized to very diverse high capacity/high power applications to date.

This new state-of-the-art facility in Italy complements Intertek's existing European battery centres of excellence in the Nordics, UK, and Germany, allowing the company to bring its expertise from more mature battery markets ...

For more than 10 years Podium has engineered and built advanced battery systems for motorsport, automotive, aerospace, marine and railway applications. With a voltage level that ranges from 400 up to 800 V and beyond, Podium's own BMS today represents a complete, scalable and reliable solution to manage energy storages.
