

Ecuador: What sources does the country get its energy from? Where do countries get their energy from - coal, oil, gas, nuclear energy or renewables? It's usually some combination of some, if not all, of these sources.

Hydropower has played a key and growing role in Ecuador's electricity mix by displacing fossil fuels and helping meet higher domestic electricity demand. In 2011, hydroelectric power accounted for 55% of the ...

Its energy Ecuador
