

IX renewables Maldives

Who is IX renewables?

IX Renewables specializes in EPCI management and consultancy for renewable energy projects, such as onshore wind, bottom fixed offshore wind, and floating offshore wind.

What can we learn from the Maldivian energy project?

The project in the Maldives explores the potential of other renewable energy sources like wind and hydrogen, as well as new technologies such as EV charging stations and vehicle-to-grid technologies. We can learn from these efforts to expand the use of renewable energy and innovative technologies in the Maldivian energy sector.

How will ASPIRE and ARISE help the Maldives' energy transition?

World Bank-financed projects ASPIRE and ARISE support the Maldives' energy transition by installing more than 53.5 megawatts of solar capacity and 50-megawatt hours of battery storage. This will reduce Maldives' annual import bill by about \$30 million, with a project lifetime saving of \$756 million over 25 years.

Which energy resources can support electricity generation in the Maldives?

Energy resources to support electricity generation. Solar PV has the highest generation potential in the Maldives and is relatively simple to deploy, operate and maintain. Onshore wind has the second highest generation potential after PV. Wind generation is more complicated to install and maintain but can produce electricity.

Will Maldives reach net-zero emissions by 2030?

Maldives has a target to reach net-zero emissions by the year 2030 with international support. World Bank has been contributing to a clean energy transition in the Maldives. The Maldives has always been the Land of Sun, Sea and Sand. Each year, more than a million tourists explore the sunny beaches and blue ocean.

When is IX renewables at WindEnergy Hamburg?

IX Renewables is excited to be part of WindEnergy Hamburg from September 24-27. If you're looking to take your renewable energy project to the next level, stop by and discover how IX Renewables can support you.

IX is kicking off an introduction course in Floating Offshore Wind development. At IX, we believe that education and cooperation are essential to achieving the global renewable energy goals. That is why we are committed to share our experience and expertise with you through a beginner's course, or webinar, on Floating Offshore Wind development.

IX Renewables is looking for an Interface Manager for Offshore Wind Projects. It is a full-time senior position on offshore wind farm projects for a manager who is highly familiar with the world of wind energy and would like to further develop in the international activities of IX Renewables.
