What is Jamaica's energy source?

This page is part of Global Energy Monitor's Latin America Energy Portal. Oil and natural gas continue to supply most of Jamaica's energy, supplemented by significantly smaller contributions from renewables. As of 2020, nearly 89% of electricity was still generated by fossil fuels.

Is Jamaica following the National Energy Policy 2009-2030?

Jamaica is currently following the National Energy Policy 2009-2030. Jamaica's December 2020 update to its NDC (Nationally Determined Contribution) aims to reduce greenhouse gas emissions by more than 25% relative to business as usual levels by 2030, with the majority of reductions coming from the energy sector.

Does Jamaica produce natural gas?

Jamaica was not producing natural gas as of 2017. In 2016, Jamaica consumed 54,000 barrels of oil per day. In 2017, Jamaica consumed 6,961 million cubic feet of natural gas.

Jamaica, through its national energy policy, Vision 2030 Jamaica - National Development Plan and its national renewable energy policy has set targets for renewable energy and the percentage diversification of energy supply. By 2030, the policy articulates that 20% of the country's energy mix would be from renewable sources.

2024-10-30: 2024 m. spalio mėn. 30 d., trečiadienį, įregistruotas juridinis asmuo KDV Energy, UAB, teisinė forma Uždaroji akcinė bendrovė, registracijos adresas Gargždai, Vyturių g. 30, LT-96146, vadovas Vygandas Urbanas, direktorius, statinis ...

Wigton Energy to build out 70MW of solar over the next two years November 26, 2024 Wigton Energy Limited ("WIG") has advised that an Addendum to the Wigton Windfarm Limited (Wigton I) Generation Licence, 2023 has been executed between the Minister of Science, Energy, Telecommunications and Transport ("Minister") and WIG effective November 21, 2024.

KdV are integrable which is a strong mathematical property. So it is not surprising that the KdV equation has found many applications in different fields of Physics such as the shallow water wave dynamics [8, 36], internal waves in two-component fluids [15] and acoustic waves in plasmas [30]. Our motivation to study the KdV-family of equations

Impact The electricity produced is among the least expensive available in Jamaica. Generates about 130,000 megawatt hours of energy per year--the equivalent of 3% of Jamaica's energy demand. Supplies energy for 25,000 customers throughout Jamaica Public Service Company. Reduces greenhouse gas emissions by 66,000 tons CO₂ equivalent per year--
