

ENEOS Renewable Energy is a company engaged in renewable energy power generation business: Preliminary surveys, planning, design, materials procurement and sales, civil engineering, electrical service, construction, ...

Solar energy in Japan is emerging as a cornerstone of Japan's strategy to meet its ambitious long-term sustainability goals. The Sixth Strategic Energy Plan aims for carbon neutrality by 2050 with an interim goal of 36-38% ...

Large-scale renewable energy projects across Japan are stuck in limbo, unable to flip the "ON" switch despite having government approval. As society strives to move on from fossil fuels, why are...

Japan is spearheading the development of two promising technologies to make optimal use of both the Earth and space and fully harness the Sun's power as electricity: space-based solar power and next-generation flexible solar cells.

Japan has long been a leader in the solar power industry, and this year it made headlines as the first Asian country to deploy floating solar systems. With an impressive installed solar capacity that, according to ...

The few unpopulated parts of the country are too hilly for practical use of Solar Power. Scientist have come up with an innovative alternate solution. Solar power farms are being built offshore on reclaimed land. In 2014, Japan turned on its ...

Kyocera Corp. has come up with a smart way to build and deploy solar power plants without gobbling up precious agricultural land in space-challenged Japan: build the plants on freshwater dams and ...

The Japanese government is planning to introduce more solar power generation, but pursuing a decarbonized society at low cost could have damaging effects on the Japanese archipelago. RELATED: [Speaking Out] ...

Ichihara city in Chiba Prefecture, Japan, will soon see a 13.4MW floating solar power plant that will produce enough electricity to power approximately 4,700 households. Kyocera TCL Solar, a joint venture formed ...

In March 2017, we started up our first solar power plant in Japan in Nanao, located on the Noto Peninsula on the country's west coast. Built over 25 hectares, with a capacity of 27 MW, it ...

Solar energy, expected to replace nuclear power as a main source of electricity, has turned into a big headache across Japan, as solar power stations have proven to be eyesores and their impact...

Japan Solar Power Plant

Solar power Japan is booming because of high feed in tariffs Report on Japan's renewable energy sector (pdf file for download) ... For solar power plants larger than 10 kWatts and approved ...
