

Jersey vectron energy

Who are Jersey Energy?

Jersey Energy are specialists in energy auditing and surveying. They are also experts in commercial strategies towards energy efficiency and the only certified BREEAM assessors within the Channel Islands. They offer low energy, efficient, and cost-effective solutions tailored to your requirements. Jersey Energy is not Jersey Gas.

How does Jersey's energy data work?

Jersey's energy data is submitted annually to the compilers of the UK's national greenhouse gas inventory, Aether, who independently verify and validate the data using internationally agreed methodologies.

Does victron energy support authorised dealers?

Be sure Victron Energy monitors the support performance of authorised dealers very closely. Victron Energy has a wide range of modular connected products that deliver energy on time, every time. Victron equipment lives up to their specifications, both in terms of performance and expected life cycle (when used as designed).

How is energy supplied to Jersey?

Energy is supplied to Jersey predominantly through imports; there is also a small amount of on-Island production. The primary supply of energy is either distributed to consumers in its original form or is transformed into different sources of energy; for example, petroleum products can be burned to generate electricity.

How many toes does Jersey electricity produce in 2021?

In 2021, Jersey Electricity (JE) used 533 toe of petroleum products to generate 122 toe of electricity. The quantity of manufactured gas produced in 2021 was 5,664 toe, a small increase when compared to 2020.

How does Jersey contribute to TPES?

There is also a small contribution (around 2%) to TPES from electricity generated within Jersey by the Energy Recovery Facility (formerly known as Energy from Waste) and Jersey Electricity solar panels. Table 1 shows TPES⁴ for each year from 2017 to 2021.

Our vision is to lead the way in transforming the energy sector for Island communities, making it more economically resilient, efficient, and environmentally inclusive. JET leverages this opportunity to drive innovation, education, training, and skills development within Jersey.

Jersey Energy are building services engineering consultants based and working within the Channel Islands, delivering sustainable, low energy and efficient solutions to all sectors and industries.
