The solar cell module is composed of imported (or domestically produced) single crystal (or polycrystalline) silicon solar cells in series and parallel, sealed with tempered glass, EVA, and TPT hot pressing, and equipped with aluminum alloy frames around it. It has strong wind and hail resistance, and is easy to install.

In addition to its solar products, Mage Solar AG also offers a range of services to support solar energy projects, including project planning, design, installation, and maintenance. The company's team of experts works closely with customers to ensure that their solar projects are designed and installed to meet their

specific needs and requirements.

SYRIA SOLAR: In 2015, the staff at UOSSM, distressed about hospitals in Syria not having stable energy, decided to tackle this immense problem. Patients were dying from a lack of stable electricity in hospitals. After a significant needs assessment and research phase, the first pilot project began construction inside Syria in December 2016. 480 ...

The use of solar energy spreads from northwestern Syria, which started relying on solar power around 2016, passing through areas in the north-east, ending with the areas under the control of the Syrian regime, which directed a clear trend to generate electricity through them, not only in large industrial facilities but even in homes.

Generate a Solar Permit Package for a design using Mage Solar 225/6PH (225W) Sign up Learn More. With SolarDesignTool, you can create a design from scratch and generate a full PV permit package in as little as 15 minutes. This page contains information about the Mage Solar 225/6PH (225W) solar panel.

Mage Solar AG is a 100 per cent subsidiary of Mage Industrie Holding AG from Reutlingen and therefore part of the Mage Group, founded more than 35 years ago by Manfred Gehring. [2] Mage Solar has a total of six subsidiaries in Germany and abroad. The company currently employs a workforce of 160 employees. [3]

From March 19 to 21, Mage Solar presents its well-known premium product line, amongst it the company's brand new signature modules providing more power and yield per square foot than ever before.
