

Kazakhstan moment energy inc

Moment Energy creates commercial-scale, sustainable energy storage solutions (ESS) from repurposed electric vehicle (EV) batteries. Our ESS helps you achieve your energy and sustainability goals. By using an ESS, you will reduce energy costs, replace fossil fuels, and facilitate the adoption of renewables.

Moment Energy helps utilities, microgrids and commercial and industrial customers improve grid reliability, power EV charging stations and reduce demand charges, all with a sustainable and performant BESS solution made from repurposed EV batteries.

The resort's battery energy storage system was the first commercial project for Moment Energy, a fast-growing B.C. startup that's giving spent EV batteries a second life as usable power systems, primarily in commercial and industrial settings.

Moment Energy, North America's leading EV battery repurposing company, introduces a groundbreaking battery energy-storage system at YVR, utilizing retired EV batteries to offer high-speed, sustainable charging solutions, marking a significant advancement in clean energy and sustainability.

Moment Energy is uniquely positioned to address three large and rapidly growing global challenges: electric vehicle (EV) battery recycling, energy storage demand growth, and global lithium material shortage. Currently, it offers energy storage systems ranging from 60kWh to 5MWh for a suite of on-grid and microgrid applications.
