Production. In 2020, Jamaica generated 4767 GWh of electricity; fossil fuels were the main energy source (88.67%), supplemented by smaller contributions from wind (5.87%), hydro (2.85%), and solar power (2.60%). More than a quarter (26.5%) of Jamaica's electrical output is lost through poor transmission and distribution infrastructure.

Jamaica's nuclear power ambitions may reset the standard for what an island energy transition looks like. Jamaica recently signed a memorandum of understanding (MoU) with Canada to explore advanced nuclear energy technologies, marking a significant step forward for the island's nuclear power ambitions. This follows Jamaica's commitment last year at COP28 ...
