

# Kyrgyzstan pm solar panel scheme

Does Kyrgyzstan have solar energy?

Kyrgyzstan's geographic location and climatic conditions are quite favourable for the broader development of solar energy, evident in solar radiation maps.

How much money did the Kyrgyz project cost?

The project was funded by the state, and the budget reportedly did not exceed KGS 2.5 million (about USD 36.6 thousand at the exchange rate of the National Bank of the Kyrgyz Republic as of 18 April 2017: USD 1 = KGS 68 2881).

How will Gazprom Kyrgyzstan improve the gas grid?

A more reliable supply of gas and implementation of Gazprom Kyrgyzstan's investment programme to improve the gas grid will further encourage switching from electricity to gas and coal.

How many hydroelectric power plants are there in Kyrgyzstan?

More than 90% of all electricity in the republic is generated by large hydroelectric power plants. However, hydro resources of small rivers in the republic constitute only 1.47% of total electricity generation in Kyrgyzstan, produced by 18 small hydroelectric power plants with a total capacity of 53.86 MW.

Does Kyrgyzstan charge a pollution fee?

However, Kyrgyzstan charges a fee for pollution; the methodology for pollution fees was approved by the government in 2011. In the oil, gas and coal extraction industries, the level of environmental protection is considered low due to insufficient regulation and legislation.

Where does power come from in Kyrgyzstan?

In Kyrgyzstan's predominantly mountainous terrain, winds of constant direction and strength sufficient for power generation can only be found in remote and sparsely populated areas.
