

How will Kyrgyzstan ensure energy security?

As part of strategies to ensure energy security, Kyrgyzstan will progressively increase the number of 'real' renewable energy projects. The NDC identifies the promotion of green energy technologies as one of the main priorities and recognises that this sector will require significant subsidies to increase its financial attractiveness.

How much does Kyrgyz energy project cost?

The project has a multi-phase programmatic approach with a financing envelope of \$125.7 million over 10 years. The first phase of the project will focus on supporting the Kyrgyz Republic to increase hydropower generation and enable renewable energy integration by strengthening the country's transmission systems.

What is Kyrgyzstan's energy saving potential?

Kyrgyzstan's energy saving potential is significant: it is estimated that rehabilitation and modernisation can save up to 25% of electricity and 15% of heat.

Who has power in Kyrgyzstan?

Executive power in Kyrgyzstan lies with the government, its subordinate ministries, state committees, administrative agencies and local administrations. In the energy sector, the government: Grants and transfers property rights, and rights for use of water, minerals and other energy resources.

Will Kyrgyz Republic's energy sector see a green light?

We in the World Bank hope that with strong political will and commitment on behalf of the authorities and broad-based support from a wide range of stakeholders, the Kyrgyz Republic's energy sector is finally set to see a green light and turn into a true driver for the country's development.

What is Kyrgyz electricity sector modernization & sustainability project?

The newly approved Kyrgyz Electricity Sector Modernization and Sustainability Project aims to improve the financial performance and operational reliability of the electricity sector and create a supportive social protection mechanism to mitigate consumer impacts of envisaged reforms.

Directeur scientifique chez RATP Smart Systems · Au sein de ProBayes, j'ai été le responsable technique de notre solution de Smart Building & Smart Energy, puis celui offre de produits de lutte anti-fraude (monétique et chèque).
