ANDRITZ is a market leader in the hydropower business, offering a complete product portfolio including turbines, generators, and additional equipment for hydraulic power generation - from "water to wire" for small hydro applications up to more than 800 MW output.

Lebanon's state electricity company (EDL) announced on Saturday that it could no longer supply power after its last operational power plant exhausted its fuel reserves. The company said the situation would affect "essential facilities such as the airport, port, water pumps, sewage systems, and prisons."

ANDRITZ HYDRO received an order from the Republic of Lebanon / CDR and ONL for the rehabilitation of generator #1 at HPP Markabi (Lebanon). The Markabi underground power plant is first inline of three power plants in a cascade generating electricity and irrigation to the surrounding area.

The Electricity of Lebanon said in a statement that the last group of production units at the Zahrani Power Plant, which supplies the country with electricity, went offline after running out of fuel.
