Is Morocco dependent on Western Sahara for its energy supply?

But these developments have made Morocco partly dependent on Western Sahara for its energy supply. Morocco already gets 18% of its installed wind capacity and 15% of its solar from the occupied territory, and by 2030 that could increase to almost half of its wind and up to a third of its solar.

What is Western Sahara's green power capacity?

Western Sahara's current green power capacity is about 1.3 gigawatts, or about a quarter of the nation's total renewables capacity. A project to develop a 3-gigawatt cable linking renewable plants in the territory to central Morocco has attracted interest from private investors, said the official.

Who owns Western Sahara?

Rabat has asserted historical title to Western Sahara since the 1950s. But the territory's right to independence has been enshrined under . A of the International Court of Justice found the justices unconvinced that the territory belonged to anyone but the native Sahrawi people. Spain first took control of the land in .

Will Morocco double green electricity production in Western Sahara?

(Bloomberg) -- Morocco, buoyed by recent foreign recognition of its rule over Western Sahara, plans to double green electricity production in the disputed territory to meet growing demand before it co-hosts the 2030 FIFA World Cup.

Which country controls Western Sahara?

Morocco controls territory to the west of the berm (border wall) while the Sahrawi Republic controls territory to the east (see map on right). Western Sahara was partitioned between Morocco and Mauritania in April 1976, with Morocco acquiring the northern two-thirds of the territory.

Is the Sahara based on economic resources?

The idea of the economic viability of the SADR being based on its economic resources is also found in Shelley (2004) and echoed by MINURSO and UN Special Envoy to the Sahara, James Baker. Kingsbury (2015) establishes that Western Sahara is illegally and militarily occupied by Morocco.
